

Battery Power

In extreme cold, engines need more power to turn over while the batteries lose power.

Temperature

Result

80 degrees - New batteries deliver 100% power

32 degrees - Starting power drops to 65%

0 degrees - Starting power drops to 40%

-20 degrees - Starting power drops to 18%

Are your batteries over two years old?

The cost of one service call or tow could pay for the installation of a new set of batteries!

See our Service Department today for the installation of new batteries
